Logo:

well-rounded life balancing a fulfilling existence that prioritizes diverse interests, relationships and career success

Balanced between work and social life

Always learning, always growing.

Grounded in faith, Growing toward purpose.

## What was hardest to decide:

- It was hard to decide which colors to choose for the infographic that would represent what the infographic is trying to say about me
- It was hard to decide on a logo that doesn't overcomplicate my message but is also original

## What did I remove:

- I first drew a balance scale symbol but decided to remove it since it was unoriginal.
- I removed brown and exchanged it with green since green better represents growth (in life and faith) and nature (outdoor hobbies).

## What does this design say about me:

- This design states that I like to live a life where all my priorities are balanced and I thrive to learn and grow in my career and faith.
- It also outlines that I enjoy nature and most of my hobbies revolve around that.
